

Pelican Hills Golf Course

Newport Beach, California

"The rockwork at Pelican Hills, Golf Course is the finest example of artificial rockwork that I have ever seen".

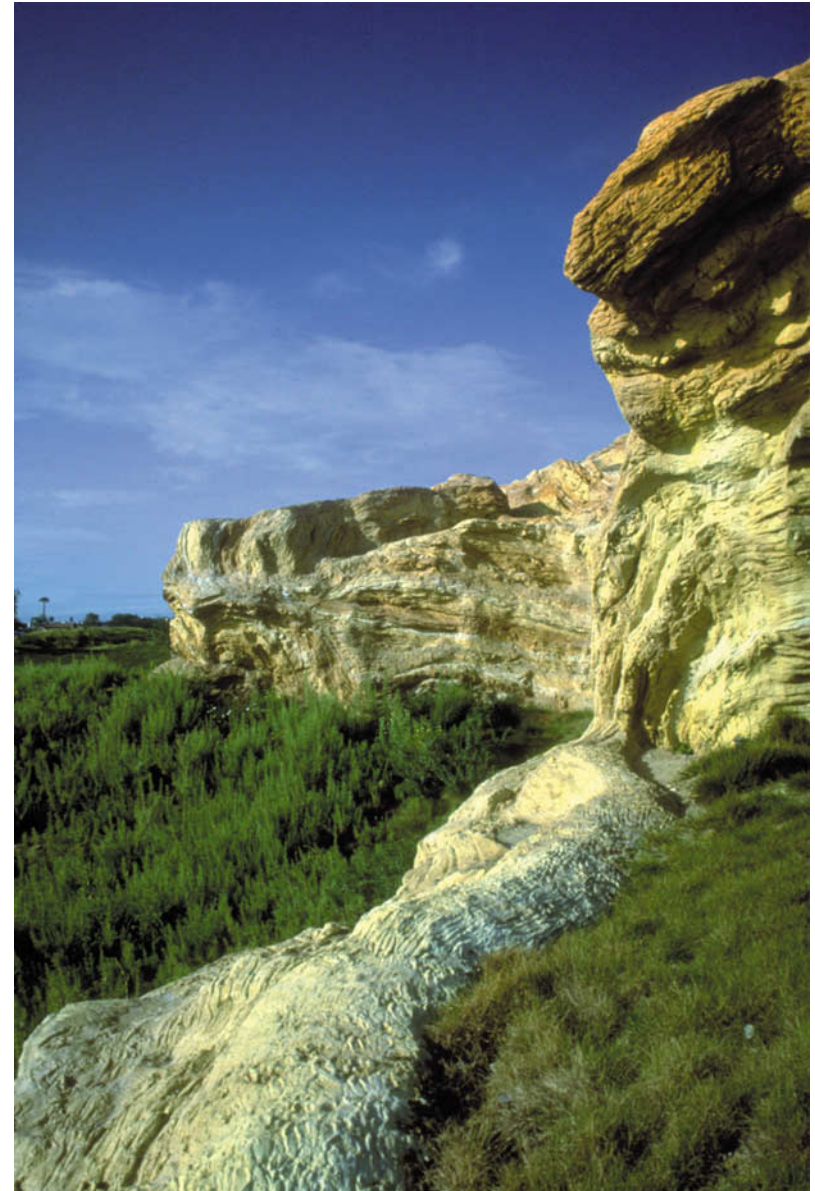

Gene Giannulli, President
Environmental Golf, Inc.

The Larson Company provided:

- Project Management
- Design Assist
- Estimating
- Scale Models
- Fabrication
- Construction & Installation

Pelican Hills is an award-winning golf course. The design of the course shows great sensitivity to the natural landscape in its use of indigenous geologic form. Larson received permission from the California Coastal Commission to take molds of fragile beach sandstone cliff formations in order to recreate the rock on Pelican Hills Golf Course in exacting detail.

This project serves as an excellent example of Larson's ability to replicate naturalistic forms. Even with difficult site conditions and pressing schedules, Larson produced features for this golf course that appear to be completely natural. The features serve both as practical solutions to site challenges as well as aesthetic statements that further the designer's vision and intent.
