

# Missouri Botanical Gardens

St. Louis, Missouri

Larson's commitment to quality reproductions of natural habitats provides a unique visitor experience.

The Larson Company provided:

- Project Management
- Design Assist
- Estimating
- Scale Models
- Fabrication
- Construction & Installation

The Missouri Botanical Gardens is one of the top three botanical gardens in the world, renowned for research, education, and display. This stunning geodesic-domed conservatory houses a tropical rain forest display, including streams, waterfalls and some 1,200 species of plants in a natural setting.

Larson directed the renovation and construction of two environments within the gardens. The first project involved the renovation of the Climatron, a tropical house. Larson designers worked with a team of landscape architects on the initial design to help detail rocks, aquatic bridges and habitats. The second project involved the design and construction of a Temperate House, which contained a tropical jungle with features reminiscent of the Mediterranean.
