

The Quarry at La Quinta

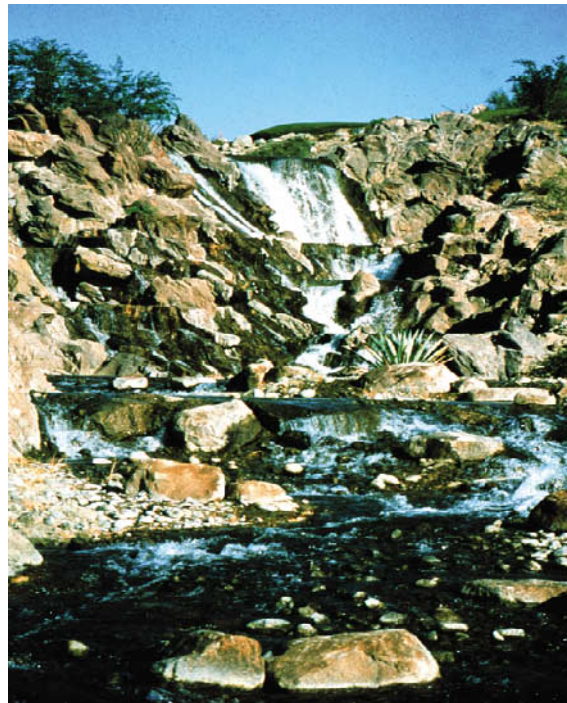

La Quinta, California

The Quarry at La Quinta has earned the praise of the world's top golfers.

Larson created spectacular artificial backdrops for this prestigious golf course, The Quarry at La Quinta. The spectacular mountain setting features waterfalls and changes in elevation.

Larson constructed the signature landscape element, a huge rock and waterfall feature. The waterfall incorporates the indigenous geology and serves as the visual icon for the entire project. Other artificial rock elements act as retaining structures to preserve the natural feel.

Larson staff worked very closely with a variety of other disciplines. The structural challenges posed by the sizable drop were solved by collaborating with the development company, the course designers and mechanical engineers.

The Larson Company provided:

- Project Management
- Design Assist
- Estimating
- Scale Models
- Fabrication
- Construction & Installation
